

Palmerston Regional Hospital Top End Health Service

Treating our patients in comfort

Palmerston Regional Hospital's General Medical Ward

Palmerston Regional Hospital is planned to open in July 2018 and will operate as a campus of Royal Darwin Hospital.

Patient and staff safety is central to everything we do and that is why we are taking a careful and considered approach to opening services to the public.

Like many other hospital openings in Australia, our services will open gradually and increase over time.

Palmerston Regional Hospital has been built to accommodate up to 24 general medical patients.

As a patient, you may be admitted directly from the hospital's emergency department after assessment by a specialist in emergency medicine.

If you have a less complex medical condition, or do not require critical care and you live around Palmerston or rural areas, you may also be admitted to the hospital.

Our medical wards have a mix of twin and single bedrooms with windows, an ensuite bathroom and television.

When you stay at Palmerston Regional Hospital, you will also have access to a patient lounge with a TV, a dining area and several private courtyards and balconies.

We also have an onsite café and a purpose-built playground for children and families using or visiting our hospital.

Top End Health Service

Working together with Royal Darwin Hospital

Royal Darwin Hospital will remain the Top End's only tertiary referral hospital. It will continue to specialise in major emergency and complex trauma care.

When it opens, Palmerston Regional Hospital will help Royal Darwin Hospital to improve and expand its focus on providing critical, complex and specialist care.

Opening day services

The hospital will provide care for up to 16 medical inpatients.

These 16 beds will help to reduce the need to transfer patients to Royal Darwin Hospital, immediately improving capacity in the Northern Territory's health system.

Expansion services

As other services, such as additional surgery procedures, come on line the hospital will open its remaining eight beds to ensure patients can remain at Palmerston Regional Hospital.
